

December 14, 2015 Update

US 85 Project Team and Corridor Stakeholder Group,

This is the third in a series of brief emails to provide project updates at key milestones for the US Highway 85 Corridor Improvements Study.

We held our first public open house on November 19th. We had about 35 attendees who heard a project overview, and provided input on the Purpose and Need, initial range of alternatives and evaluation criteria. In case you were unable to attend and would like to learn more we have provided all of the meeting materials on the project website.

We have placed a survey, interactive map and comment form on our online open house at the link below. We would appreciate your input before Friday, December 18th.

Please take a peek and provide feedback to help shape the corridor! We anticipate holding our next public meeting early next year to review our second round of alternatives. Please check back on the project website in January for details.

If you have any questions feel free to contact me or provide thoughts or suggestions at <http://us85douglascounty.com/contact-us/>
